

SR8301440 [Sears Mid Back Seat, Brown Fabric w/ Air Suspension]

Instruction Guide

Installation instructions to replace an original deluxe mechanical seat and suspension with SR8301440 and air suspension in a John Deere early 30-55 Series Row Crop Tractor

1. Remove the original seat and suspension
2. For models with the slanted front section on the seat well, bolt plate (A) to the bottom of the pedestal with two 5/16" x 3/4" carriage bolts and flange nuts. For models with the square front section, use plate (B)
3. Bolt the suspension to the pedestal with four 8mm x 20mm bolts. Use four 7/16" nuts as spacers on the pedestal (see illustration below). If spacer nuts are not used, the suspension will not have full travel.
4. Mount the pedestal to the back of the cab with the original bolts
5. Drill two 5/16" holes through the support plate on the bottom of the pedestal and fasten with two 5/16" x 3/4" bolts and flange nuts
6. Connect the suspension to a power source and ground
